

INTRODUCING A NEW FERODO BRAKE FLUID PACKAGING

We are announcing a significant update to our brake fluid packaging, designed to offer a better customer experience, an improved access to information on the label, and to continuously ensure compliance with Classification, Labelling, and Packaging (CLP) regulations. This change brings several key benefits to our customers and our brand.

OLD**NEW**

WHY THE CHANGE?

1. CONTINUOUS REGULATORY COMPLIANCE:

- ▼ Safety information is visible at the backside of the bottle in the relevant languages.
- ▼ The new packaging and labelling are fully compliant with latest CLP regulations, ensuring that our products continuously meet the highest safety standards.

2. COMMITMENT:

- ▼ Our new packaging demonstrates our commitment to quality and regulatory adherence.

BENEFITS OF THE NEW PACKAGING

STREAMLINED PRODUCT RANGE:

- ▼ The transition will prioritize our DOT4 brake fluid in 500ml (FBX050), 1Litre (FBX100), and 5Litre (FBX500) bottles, with other grades to follow.

The new brake fluid packaging maintains full regulatory compliance while offering our customers improved product safety and reliability. This change reinforces our commitment to innovation, quality, and customer satisfaction.
